

Project Design Phase-I
Proposed Solution Template

Date	27 September 2022
Team ID	PNT2022TMID07374
Project Name	News Tracker Application
Maximum Marks	2 Marks

Proposed Solution:

S.NO.	Parameter	Description
1.	Problem Statement (Problem to be solved)	<p>Statement: Numerous events take place daily around the world, and we depend on newspapers, television, and news articles to provide us with accurate information.</p> <p>Description: In order to provide such news from dependable sources globally in an orderly and effective manner, we developed a platform.</p>
2.	Idea / Solution description	<p>One location for all national and international news.</p> <p>News that you can rely on.</p> <p>a quick and effective system.</p> <p>limiting the dissemination of false information.</p> <p>Data backup and storage.</p> <p>Communication.</p>
3.	Novelty / Uniqueness	<p>Employing computers and networks, a news application based on cloud computing generates news and reports about events around the globe (Internet).</p> <p>News based on the most dependable and trustworthy sources worldwide.</p> <p>Constructing a sustainable and eco-friendly center</p>
4.	Social Impact / Customer Satisfaction	<p>The ability to produce, organize, and exchange information globally is provided by cloud computing. Utilizing cloud-based services enables quick sharing of critical information and access to a wider range of data.</p> <p>Our platform stops the propagation of misleading information and exposes the injustice and harm committed by erroneous organizations.</p> <p>Eliminating false information improves knowledge dissemination and understanding of real-world occurrences.</p>

5.	Business Model (Revenue Model)	<p>The topics covered by our application vary from politics to business to criminal justice to the environment to technology.</p> <p>Our company concept will be monetized and generate revenue by running on a subscription-based, monthly and annual basis.</p>
6.	Scalability of the Solution	<p>One of the criteria for measuring how well cloud services are used by enterprises is scalability.</p> <p>By expanding resource allocation and managing fluctuating demand without compromising the effectiveness or calibre of our internal operations and customer service, cloud scalability will help to grow the user base.</p> <p>Delivering timely, accurate news while fostering strong bonds with your clients.</p>
