1. INTRODUCTION

a. Project Overview

As our lives are very busy these days, we often feel we need more than 24 hrs. a day to cope up with everything we have in our schedule. Well, that's not possible but reducing the time by changing the conventional method of reading news can help. Just tell us what market news you're interested in and get a quick peek for the day. Only read what you feel is relevant and save your time. This app helps you to query for all information about Indices, Commodities, Currencies, Future Rates, Bonds, etc

b. Purpose

Newspapers are one of the most popular and most needed commodities in our daily life. In today's busy world, reading newspapers has become one of the traditional ways of getting news. News is produced every minute and distributed via television, radio and the Internet, so the news updated the next morning is already outdated. So newspaper and magazine publishers have a hard time keeping up with the pace. Change is needed and publishers must embrace mobile.

2.2 Problem Statement Definition

In today's world we have a lot of work and there is no time to cope up with everything in the schedule. So, it is not possible to read the newspaper. By using this application, the user can access the news they are interested in and get a quick peek for the day. There are multiple news-sharing apps used by a single user and are often spammed with notifications. There is also a lot

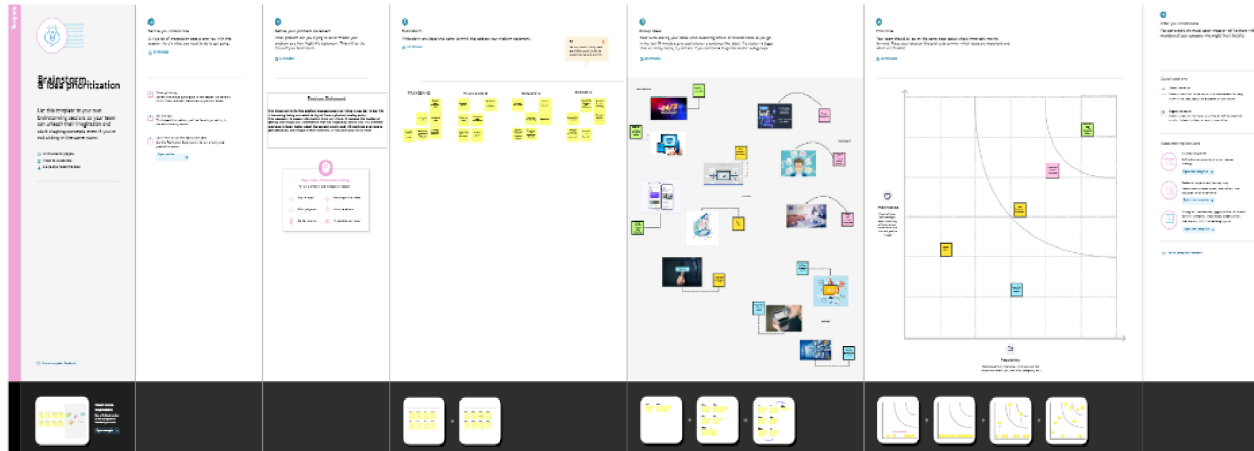

of fake news which gets shared. A news sharing app wants to help users find relevant and important news easily every day and also understand explicitly that the news is not fake but from proper sources. This news tracker application helps the user to get all information about commodities, sports, technology, education etc. The user can register using their personal details and interact with the application and save their time. Creating an app that benefits with the smart news filtering functionality where it allows its users to segregate various news sections, comprising business, sports, political, international, and more. The users can opt for filters like Breaking News, Most Popular, and more. Creating a user-friendly news app that would not just have good number of features, but will also be able to get accessed by different types of users keeping the experience delightful

3.IDEATION & PROPOSED SOLUTION

3.1.Empathy Map Canvas

3.2.Ideation & Brainstorming

3.3.Proposed Solution

S.NO.	Parameter	Description
1.	Problem Statement (Problem to be solved)	Statement: Numerous events take place daily around the world, and we depend on newspapers, television, and news articles to provide us with accurate information. Description: In order to provide such news from dependable sources globally in an orderly and effective manner, we developed a platform.
2.	Idea / Solution description	One location for all national and international news. News that you can rely on. a quick and effective system. limiting the dissemination of false information. Data backup and storage. Communication.
3.	Novelty / Uniqueness	Employing computers and networks, a news application based on cloud computing generates news and reports about events around the globe (Internet). News based on the most dependable and trustworthy sources worldwide. Constructing a sustainable and eco-friendly centre

4.	Social Impact / Customer Satisfaction	<p>The ability to produce, organise, and exchange information globally is provided by cloud computing. Utilising cloud-based services enables quick sharing of critical information and access to a wider range of data.</p> <p>Our platform stops the propagation of misleading information and exposes the injustice and harm committed by erroneous organisations.</p> <p>Eliminating false information improves knowledge dissemination and understanding of real-world occurrences.</p>
5.	Business Model (Revenue Model)	<p>The topics covered by our application vary from politics to business to criminal justice to the environment to technology.</p> <p>Our company concept will be monetized and generate revenue by running on a subscription based, monthly and annual basis</p>
6.	Scalability of the Solution	<p>One of the criteria for measuring how well cloud services are used by enterprises is scalability.</p> <p>By expanding resource allocation and managing fluctuating demand without compromising the effectiveness or calibre of our internal operations and customer service, cloud scalability will help to grow the user base</p> <p>Delivering timely, accurate news while fostering strong bonds with your clients.</p>

3.4.Problem Solution fit

Project Title: News Tracker Application			Project Design Phase-I - Solution Fit			Team ID: PNT2022TMD07374		
Define CS, fit into CC	1. CUSTOMER SEGMENT(S) Professionals in the workforce who lack the time to read the newspaper.	CS	6. CUSTOMER CONSTRAINTS Time and Budget.	CC	5. AVAILABLE SOLUTIONS Newspaper is an alternative to News tracker Application. Pros: Users no longer need to read the news which they are not interested Cons: Screen time may get increased.	AS	Explore AS, differentiate	
	2. JOBS-TO-BE-DONE / PROBLEMS 1. Reading the newspaper takes time. 2. The user could read uninteresting news. 3. Regular newspaper purchases result in astronomical newspaper expenditures and sometimes undesirable scrap.	J&P	9. PROBLEM ROOT CAUSE In the past, there was no other way to keep up with current events except to read the newspaper because users lacked access to the internet.	RC	7. BEHAVIOUR The user must take the following actions: 1. Open an account on our web application. 2. Sign in to our web application.	BE		Focus on J&P, fit into BE, understand RC
Identify strong TR & EM	3. TRIGGERS When a user notices their neighbor's quitting their newspaper subscriptions, they sign up for the News Tracking Application.	TR	10. YOUR SOLUTION We designed this application so that it is difficult to display bogus news in it, and we categories the news according to user interests to help our busy users save time.	SL	8. CHANNELS of BEHAVIOUR 8.1 Online: Users can group news stories based on their interests and receive notifications. 8.2 Offline: The user can download and read offline the detailed news from the headlines.	CH	Identify strong TR & EM	
	4. EMOTIONS: BEFORE / AFTER Can only see news in a newspaper or on television? You can see news anywhere, anytime with simply a mobile phone.	EM						

4.REQUIREMENT ANALYSIS

4.1Functional requirement

FR No.	Functional Requirement (Epic)	Sub Requirement (Story / Sub-Task)
FR-1	User Installation	➤ Install the app from Google play store or from the website
FR-2	User Registration	1. Registration through Form 2. Registration through Gmail
FR-3	User Confirmation	1. Confirmation via Email 2. Confirmation via OTP
FR-3	Location based	➤ News according to user's geo-location Track the Location of the news Local and Global News

FR-4	Real time News	<ol style="list-style-type: none"> 1. News with real-time updates. 2. Actively connected to Cloud and News 3. Sources Auto update news because of the usage of API Number of comments in News
FR-5	Search based	<ol style="list-style-type: none"> 1. Category-Wise News 2. Consumer interest-based News 3. Headlines and Trending News 4. Categorised News to help users reach content.

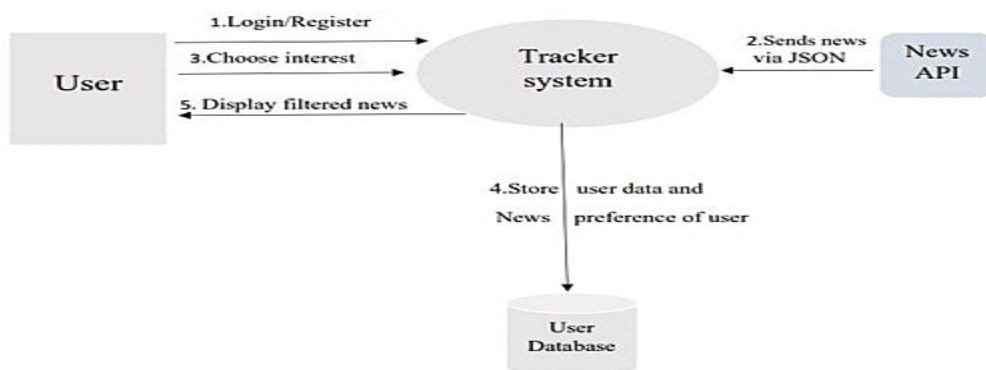

4.2Non-Functional requirements

FR No.	Non-Functional Requirement	Description
NFR-1	Usability	<ol style="list-style-type: none"> 1. Up-to-date News 2. User-friendly Application 3. Compact and Clean UI 4. Trust-worthy and reliable News 5. Cloud-based microservices 6. Interest based News 7. Filtering function 8. Searching the information 9. Specific criteria and parameters
NFR-2	Security	<ol style="list-style-type: none"> 1. Authentication and password management Spam of offensive comments. 2. Safe from bots
NFR-3	Reliability	<ol style="list-style-type: none"> 1. Trusted News sources 2. Instant news at any particular time 3. Location of the news

NFR-4	Performance	<ol style="list-style-type: none"> 1. Relevancy based news/story shared first. 2. Keep your user's attention with list views
NFR-5	Availability	➤ More sub-categories are available.
NFR-6	Scalability	<ol style="list-style-type: none"> 1. Designing scalability tests Come up with possible user scenarios. You can modify them in various ways 2. Design a load test with a set number of virtual users 3. Run your test to simulate user requests.

5.PROJECT DESIGN

5.1Data Flow Diagrams

5.2. Solution & Technical Architecture

- a. Find the best tech solution to solve existing business problems.
- b. Describe the structure, characteristics, behaviour, and other aspects of the software to project stakeholders.

- c. Define features, development phases, and solution requirements.
- d. Provide specifications according to which the solution is defined, managed, and delivered.

5.3.User Stories

As our lives are very busy these days, we often feel we need more than 24 hrs. a day to cope up with everything we have in our schedule. Well, that's not possible but reducing the time by changing the conventional method of reading news can help. Just tell us what market news you're interested in and get a quick peek for the day. Only read what you feel is relevant and save your time. This app helps you to query for all information about Indices, Commodities, Currencies, Future Rates, Bonds, etc.... as on official websites.

6.PROJECT PLANNING & SCHEDULING

1. 1.Sprint Planning & Estimation

Sprint	Functional Requirement (Epic)	User Story Number	User Story / Task	Story Points	Priority	Team Members
Sprint1	Registration	USN-1	As a user, I can register for the application by entering my email, password, and confirming my password.	2	High	Tamilmani
Sprint1		USN-2	As a user, I will receive confirmation email once I have registered for the application	1	High	Tamilmani
Sprint1		USN-3	As a user, I can register for the application through Facebook	1	Medium	Praveen
Sprint1		USN-4	As a user, I can register for the application through Gmail	2	Medium	Sanjay

Sprint1	Login	USN-5	As a user, I can log into the application by entering email & password	2	High	Sanjay
Sprint2	Dashboard	USN-6	As a user I should be able to navigate and access all the features hassle free	1	Low	Praveen
Sprint2	Layout	USN-7	As a user I should be able to access the portal with different devices with the same comfort	2	High	Sanjay
Sprint3	Data Store and retrieval	USN-8	Get Data from API and store as JSON in DB2	3	High	Praveen
Sprint3		USN-9	Get bin data from API and store in DFS	2	High	Subash
Sprint4	User Segregation And data access	USN-10	As a CC executive I should be able to uniquely identify the customer and offer help	1	Low	Subash
Sprint4	Change code	USN-11	As an administrator I should be able to modify code according to the future requirements.	2	Medium	Tamilmani
Sprint4	Monitor the system	USN-12	As an administrator I should be able to monitor the cloud system and fix errors before customer.	2	High	Subash

6.2.Sprint Delivery Schedule

Sprint	Total Story Points	Duration	Sprint Start Date	Sprint End Date (Planned)	Story Points Completed (as on Planned End Date)	Sprint Release Date (Actual)

Sprint-1	20	6 Days	20 Oct 2022	27 Oct 2022	8	27 Oct 2022
Sprint-2	20	6 Days	27 Oct 2022	03 Nov 2022	3	03 Nov 2022
Sprint-3	20	6 Days	03 Nov 2022	10 Nov 2022	5	10 Nov 2022
Sprint-4	20	6 Days	10 Nov 2022	17 Nov 2022	5	17 Nov 2022

6.3.Reports from JIRA

Sprint-1

The screenshot displays the Jira Software interface for the 'newstracker2' project. The main view is the 'Sprint 1' board, which is a Kanban-style board. The board is divided into three columns: 'TO DO 4 OF 11 ISSUES', 'IN PROGRESS', and 'DONE'. The 'TO DO' column contains four issues: 'login page' (NEWSTRASK2-17), 'register page' (NEWSTRASK2-18), 'styling' (NEWSTRASK2-19), and 'dash board' (NEWSTRASK2-20). The 'IN PROGRESS' and 'DONE' columns are currently empty. The interface includes a sidebar with navigation options like 'Roadmap', 'Backlog', and 'Board'. The top navigation bar shows the project name 'newstracker2' and the current sprint 'Sprint 1'.

Navaneeth
.loginPage_TC_005	Functional	Login page	Verify user is able to log into application with Invalid credentials		1.Enter URL(http://shopqaar.com/) and click go 2.Click on My Account dropdowns button 3.Enter Invalid username/email in Email test box 4.Enter invalid password in password test box	Username: chahar@gmail.com password: Turing123578656789076	Application should show "Incorrect email or password" validation message.						Navaneeth

9.RESULTS

9.1Performance Metrics

10.ADVANTAGES

1. All trending news will be displayed in a orderly manner.
2. We can costumize the topic which we are interested and make them display.
3. The user experience are quit simple and friendly.

10.DISADVANTAGES

1. Same news which is published in different websites can be displayed.
2. Delay response of news api can make the news collapse.

11.CONCLUSION

Thus the projected using IBM CLOUD is tested,verified and executed successfully.

12.Future scope

In future, we planned to implement this project in large scale which will be helpful and used by all the people.
